Re: Airmax High Velocity Air Handler and Prioritization Two Zone System for the  
Avonshire West Townhomes

---

Dear Mr. Van Beurden

I would like to take this opportunity to thank you for providing us with a product and system that has not only exceeded our expectations but that of our residents.

With full occupancy being achieved throughout the fifty (51) townhouse units and residents going through a full cycle change of cooling and heating we have had nothing but positive feedback especially with regards to the Prioritization two zone system.

We would like to thank your design team in encouraging us to precede with the Prioritization two zone systems especially from a comfort and efficiency perspective.

We rely on the dependability of products from suppliers like you to help satisfy our residents and future customers.

We appreciate your efforts and look forward to continuing our business relationship in the years to come.

Sincerely,

Louie Giannakopoulos  
Project Manager
